

# Stage Engineering Apprentice

## Case Study

**Name: Priya  
Sembi-Harding**

### **Where did you see the apprenticeship advertised?**

At college

### **What made you apply for the apprenticeship?**

It was an opportunity to expand my knowledge in engineering. The location was also a bonus!

### **Describe a 'typical day' as an apprentice at the ROH?**

Every day is different! All days start with a cup of tea, but then pretty much anything could happen! It is a particularly busy day if hydraulics are being used on stage.

### **How do you find the workplace/college balance?**

I do 2 days a week at college, and 3 days at the ROH. It is a good balance. Nice to still get the weekend off!

### **What do you enjoy most about your apprenticeship?**

The fact that you learn something new every day. You never know what you'll be working on next.

### **Is the apprenticeship what you expected?**

I had no idea what to expect. It is a whole new experience – in a good way! I feel more independent now that I am part of the working world.

### **What would you like to do after your apprenticeship is completed?**

No idea. Many options to consider! I am hoping that my time and experiences at the ROH will open some exciting doors for me in the future.

### **What advice would you give to someone considering applying for an apprenticeship at the ROH?**

Have an open mind. There are so many opportunities and learning experiences to take advantage of here.
